

Heating system service plans that provide total peace of mind.

Value & Premier

Oil Heating System Service Plans

ROMANELLI ENERGY

Home Comfort Professionals

Choose the plan that's best for you and your home.

The image shows the side of a white van. At the top left, there is a logo for "ROMANELLI ENERGY" in blue and red text, with a red underline. Below the logo is the tagline "Home Comfort Professionals" in a smaller, blue font. The van's side door is visible, featuring a black handle. To the right, the rear taillight is partially visible, showing red and white sections. The background is slightly blurred, suggesting an outdoor setting.

ROMANELLI ENERGY

Home Comfort Professionals

The service plans you need to keep your heating oil system up and running.

For more than 80 years, Romanelli Energy has been delivering the best products and services to generations of satisfied customers. Our friendly local team provides satisfaction every day with reliable delivery, expert service and installation, and valuable advice on conserving fuel and saving money. Now more than ever, our knowledge and expertise are helping customers keep their energy costs under control.

We're always striving to do our best to bring customers the best products and services. That's why we have comprehensive service plan options to keep your heating oil system working all year while providing the peace of mind you need if any emergency problems do happen.

Oil Heating System Service Plans

Just like changing the oil in your car, your oil heating system should be tuned up annually to help reduce the amount of fuel that your system uses, which is good for your energy savings and the environment. Each of our service plans provide you with:

Quality repairs by experienced technicians

Expert customer service reps to take your calls 24/7

Convenient service hours

Annual tune-ups to help you save money

15% discount on non-covered repairs

How your oil-fired heating system works.

Heat distribution

Oil-fired heating systems distribute heat in one of three ways: warm air through vents, hot water through baseboards, or steam through radiators. Your thermostat senses that room temperature has fallen below your thermostat setting and sends a signal to your heating system to provide heat for your home.

When your oil burner is engaged, heating oil travels from the tank to the burner by way of a pump where it becomes a fine mist mixed with air. The fuel/air mixture is then injected into the burner where it is ignited in the combustion chamber.

Heating system types

Depending on the type of system you have, water-based or warm air, the system works differently to disperse heat throughout your home.

There are two main types of water-based systems: hot water systems and steam systems. Water is heated in either a cast iron or steel boiler before it is dispersed throughout your home.

In a hot water system, the heated water is circulated through radiators or baseboards.

In a steam system, water turns to steam and rises through pipes to the radiators. In a warm air system, your furnace heats air. A blower then sends the heated air up through ducts and out of vents in your floors or walls. The air gets drawn back to the furnace through a return duct, and the cycle repeats.

Finally, emissions from the combustion of fuel and air exit the system through a flue pipe that runs out of your home through the chimney.

Typical Hydronic System

Hot water or steam

Typical Warm Air System

Still need more coverage?

We have other enhancements and agreements that are available at an additional cost to your existing plan and these are priced separately. They allow you to extend your coverage with more comprehensive protection and help you prepare for unexpected repair costs by allowing you to customize your protection to suit your needs. You must currently have a Romanelli Energy Value or Premier Service Plan to add any enhancement coverage.

Optional enhancements

24 Hours-a-Day/365 Days-a-Year Service

This enhancement extends your primary coverage by giving you access to Romanelli Energy service 24 hours a day, 365 days a year. It waives our after hours diagnostic fee.

Direct and Indirect Water Heater Repair and Part Replacement*

This enhancement covers repairs and replacement of the parts listed below:

Air tube	Drip tube	Nozzle
Aquastat (auto type only)	Electrodes	Nozzle adapter
Burner coupling	Electrode wire & clips	Nozzle line
Burner fan	Emergency switch	Oil check valve
Burner motor	End cone	Oil filter cartridge
Cad cell complete	Firomatic valve	Oil filter complete
Circulator (bronze type, up to 1/16 HP)	Flue pipe (up to 9" diameter)	Oil safety valve
Delayed oil valve	Fuel pump	Porcelains
Draft regulator (up to 9" diameter)	Fuel pump gasket	Preference relay
Drain valve	Fuel pump strainer	Primary control
	Igniters	Relief valve
	Ignition transformer	

*Covers residential, oil-fired water heaters up to a maximum firing rate of 1.25 gallons per hour. **Excludes coverage of the water heater tank**, recirculation lines and components, and anode rods. Service requested to start prior to 8:00am or after 5:00pm, on federal holidays (days when the post office is closed), or weekends, is subject to our standard diagnostic fee, unless you have purchased the 24/365 enhancement. Repair and/or replacement must be performed by Romanelli Energy.

Limited Boiler and Furnace Replacement**

This coverage provides an allowance of \$1,000 toward replacement of your main heating boiler or furnace if a Romanelli Energy inspection determines that your existing equipment is not repairable. The new boiler or furnace must be replaced by Romanelli Energy. Allowance is payable as a reduction to our normal retail price for the model specified.

**Existing equipment must be inspected by Romanelli Energy to qualify.

Optional Zone Coverage[†]

This enhancement covers repair and replacement of the parts listed below:

Automatic air vents (boiler room only)	Circulator relay
Circulator complete (up to 1/12 HP)	Flow check valve (up to 1-1/2" diam.)
Circulator coupling (up to 1/12 HP)	Isolation valves (up to 1-1/2" diam.)
Circulator flanges and gaskets (up to 1-1/2" diameter)	Thermostat (standard)
Circulator impeller (up to 1/12 HP)	Thermostat (clock type \$50 credit)
Circulator motor (up to 1/12 HP)	Zone valve (up to 1" diameter)
Circulator mounts (up to 1/12 HP)	Zone valve motor (up to 1" diameter)

***Not available on steam systems and excludes air handlers.** Service requested to start prior to 8:00am or after 5:00pm, on federal holidays (days when the post office is closed) or weekends, is subject to our standard diagnostic fee, unless you have purchased the 24/365 enhancement. Repair and/or replacement must be performed by Romanelli Energy.

Additional agreements

CARE[®] Environmental Protection

Fortunately, oil releases don't happen too often. But when they do, they can damage the environment and cost thousands of dollars to clean up. And worse, most homeowners insurance doesn't cover oil releases. The CARE program protects your investment in your home by providing clean-up coverage in case your tank, connected piping or oil lines leak. The CARE program is available for above-ground fuel tanks[‡] and provides:

- Up to \$100,000 for clean-up (does not include tank replacement)
- Clean-up of releases from entire fuel oil system, including piping and lines
- Limited cost share
- Transferable if you sell your home
- Experienced professionals to handle the work

[‡]A separate program is available for underground fuel oil storage tanks. Underground oil tanks require a one-time testing fee in addition to the cost of the program.

Oil Tank Agreement

In the event of an oil tank failure, this agreement gives you an allowance of \$750 toward a replacement tank. Your allowance is payable as a reduction to our normal retail price for the model specified. Replacement or repair must be done by Romanelli Energy.

Additionally, this coverage includes:

- Exposed fill and vent lines (up to 15' from the tank)
- Exposed oil lines (up to 15' from the tank), tank legs, vent alarm and tank valve
